# Introducing CogniCare

Quality Care for Loved Ones  
Experiencing Cognitive  
Changes

Most home care providers say they offer memory care services. At Home Care Assistance, we have invested in developing a program to provide the best-in-class cognitive care. Our memory care program, CogniCare, is staffed with hand-selected CogniCare caregivers and Client Care Managers, each required to pass our rigorous certification training. You have an entire team to support your loved one and your family. The Care Team not only knows how to deal with the specific challenges these diseases bring forth, but they also can make sound recommendations and provide guidance along your loved one's journey.

## CogniCare goes beyond traditional home care by offering:

- A program based on the proven training model of a renowned nationwide memory care provider
- A hand-selected caregiver that has passed the rigorous CogniCare certification training
- A CogniCare certified Client Care Manager to provide guidance and coordinate care with the client's family
- Access to a specially curated database of activities to promote mental stimulation and overall well-being
- Specialized reporting to keep family members and medical care managers up-to-date as daily care needs evolve

Call today to schedule a free in-home assessment and develop a personalized CogniCare

# Quality Care Tailored to Your Loved One's Needs

The CogniCare program is designed to provide caregivers and client care managers with the tools and knowledge they need to effectively manage, communicate and improve the quality of life of those living with dementia.

The training uses real-world examples, active recall and knowledge-based tests to ensure that the Care Team not only understands the information, but is also able to integrate it into our client care plans and apply it in the client's home.

## CogniCare Follows the Latest Science in Cognitive Health

Caregivers and Client Care Managers are taught crucial dementia care skills, including:

- Understanding types of dementia
- Managing physical behaviors
- Managing challenging behaviors
- Managing emotional behaviors
- Communicating with clients
- Redirection techniques
- Normalization
- Understanding the progression of cognitive diseases

# CHAMPIONS OF AGING WELL

At Home Care Assistance, we provide customized care to older adults so they can live happier, healthier lives at home.

We champion the needs of seniors with a positive, empowering approach to aging that celebrates independence, dignity and quality of life.

Our caregivers receive exceptional training, support and resources to deliver an unmatched care experience.
